Researcher on Education design for new educational challenges of universities, for Wageningen University & Research and the 4TU.Centre for Engineering Education.

Emiel van Puffelen is doing research on Education design for new educational challenges of universities, for Wageningen University & Research (WUR) and 4TU.Centre for Engineering Education (4TU.CEE). He has successfully led WUR in participating within 4TU.CEE where the four Dutch technical universities jointly work on education innovation. At WUR, he also supervised the creation and full-scale operation of the University Teaching Qualification program. As a management team member he developed knowledge clip studios, education innovation consultancy, educational portals, and teams to innovate the IT learning environment. He is a senior consultant for higher education innovation and works for (inter)national organizations.
